

A BIBLIOGRAPHY OF THE ANOPLURA OR SUCKING LICE.

L. FREUND

Zool. Institute of the Martin-Luther-University, Halle-S.

(Accepted for publication December 31, 1949.)

This is a further collection of the literature concerning the sucking lice or Anoplura, comprehending the publications from 1927 til 1948. The publications prior to 1927 has the author published in the Zentralblatt für Bakteriologie und Parasitenkunde, Abt. I, Ref. 1927, p. 343—384. Therewith is the bibliography completed up to date, including a couple of titles omitted in the former publication. Regarding the importance of the sucking lice as transporters of diseases especially of the spotted fever is the utility of such a collection for further investigations without doubt.
